

Syllabus of the educational discipline
«Functional Logistics»

Specialty	073 Management	
Study Programme	Logistics	
Study cycle (Bachelor, Master, PhD)	the first (Bachelor) level of higher education	
Course status	mandatory	
Language	English	
Term	third year, sixth semester	
ECTS credits	10	
Workload	Lectures - 48 hours.	
	Practical studies – 24 hours.	
	Laboratory studies - 24 hours.	
	Self-study – 204 hours.	
Assessment system	Grading including Exam	
Department	Department of Management, Logistics and Innovation auditorium 225 of the main educational building phone (057)702 02 65(add 3-02) website http://kafmli.hneu.edu.ua/	
Teaching staff	Kolodizieva Tetiana Olexandrivna, PhD in Economics, Associate Professor	
Contacts	kolodizeva @ ukr.net	
Course schedule	Lectures: according to the schedule	
	Practical studies: according to the schedule	
	Laboratory studies: according to the schedule	
Consultations	At the Department of Management, Logistics and Innovation, offline, according to the schedule, individual, PNS chat.	
Learning objectives and skills:		
The purpose of the course "Functional logistics" is to study the basic functions of logistics in detail, mastering theoretical knowledge and practical skills of organizational, technological, technical and information support of the basic functions of logistics.		
Structural and logical scheme of the course		
Prerequisites	Postrequisites	
Econometrics	Logistics service	
Logistics	Comprehensive professional training	
Marketing	Pre-diploma internship	
	Diploma thesis	
The content of the discipline		
Content module 1 . Cargo processing logistics		
Topic 1. Logistics of cargo processing. Cargo processing in logistics networks		
Theme 2. Cargo containerization		
Theme 3 Methods of identification and data storage in logistics management		
Theme 4. Information support of basic logistics elements : stocks and warehousing, transportation and forwarding, production, distribution		
Theme 5. Integrated information technologies in cargo processing logistics		
Content module 2 . Transport logistics		
Theme 6. The essence of transport logistics		
Theme 7 . Transportation technology		
Theme 8. Analysis of the efficiency of the transport process		
Theme 9 . Transportation routing		

Theme 10 . Cargo insurance and carriers' liability
Theme 11 . The role and importance of transport and forwarding support
Content module 3 . Production logistics
Theme 12 . Production logistics and the effectiveness of the application of the logistics approach to the management of material flows in production
Theme 13 . Material flow management systems in production: what pushes and what pulls
Theme 14 . Organization of production and logistics
Theme 15 . Choice of production location
Theme 16 . The main indicators of production logistics
Content module 4 . Logistics stock in
Theme 17 . Inventory in logistics
Theme 18 . Systems of optimal inventory management
Content module 5 . Warehouse logistics
Theme 19 . Warehouse logistics
Theme 20 . Logistics process in the warehouse
Theme 21 . Organization of warehouse processes with elements of logistics
Theme 22 . Cargo unit, as the logistics element
Theme 23 . Organization of document flow in the warehouse
Content module 6. Purchasing logistics
Theme 24. Material and technical support, system and form of supplies
Theme 25. Purchasing activity
Theme 26. Management of purchases and orders
Theme 27. Selection of suppliers and organization of supply
Theme 28. Technology of decision - making and documentation during the organization of purchases
Content module 7. Sales logistics
Theme 29. Sales policy of the enterprise
Theme 30. The essence of distribution logistics
Theme 31. Distribution channels in logistics

Teaching environment (software)

Multimedia projector, S. Kuznets PNS, Corporate Zoom system, software: MS Excel

Assessment system

The University uses a 100-point cumulative system for assessing the learning outcomes of students. Current control is carried out during lecture, practical and laboratory classes and is aimed at checking the level of readiness of a higher education applicant to perform a specific job and is evaluated by the sum of points scored: – for course with a form of semester control as an exam: the maximum amount is 60 points; minimum amount required is 35 points.

The final control includes the semester control and assessment of the student. The maximum number of points that a student of higher education can receive during the examination (examination) is 40 points. The minimum amount for which the exam is considered passed is 25 points. Semester control is carried out in the form of a semester exam (exam). Current control includes the following assessment methods test surveys on lecture topics, written control work, experimental work, practical and laboratory works.

More detailed information on assessment and grading system is given in the technological card of the course.

Course policies

Teaching of the academic discipline is based on the principles of academic integrity.

Violation of academic integrity includes academic plagiarism, fabrication, falsification, cheating, deception, bribery, and biased assessment.

Education seekers may be brought to the following academic responsibility for breach of academic integrity: repeated assessment of the corresponding type of learning activity.

More detailed information about competencies, learning outcomes, teaching methods, assessment forms, self-study is given in the Course program
